

**CONTACT**  
is revolutionary.

... because it's just fun!

In the game, you track a mysterious signal of which you know neither the origin nor the source. It will lead you to a specific planet. Instead of space coordinates you only receive a strange set of flight commands for your spaceship. Can you use these to work out the correct target planet? And what will you find when you get there?

CONTACT is a cooperative deep space adventure that provides more than just science fiction.
