EXACTO

Have a look and you will see, it all matches perfectly!

Who is better at assessing distances - children or adults? Two holes are punched in each board and exactly two coloured circles on each of the 15 board cards have exactly the same distance between them. But which circles? The task is to find the fitting two circles using only your eyes. Not so easy!

EXACTO features surprisingly simple rules and offers a fascinating task that will test your sense of distance more than once.
